

ID-GRM-1 In-Wall Box Grommet

The ID-GRM-1 grommet is the perfect addition to the ID-IWB-2 enclosure. The ID-GRM-1 slips easily into place and protects your wires. Because it is larger on one side, it will not fall through the opening and into the wall.

The soft ABS rubber lets wires easily slip through yet resists them from falling back into the wall.

- White PVC Rubber
- Sold in Pairs
