CADDY[®] CAT LINKS

Unleash the versatility

ERICO[®]

CADDY® CAT LINKS: Overview

CADDY® CAT LINKS is the most technologically advanced cable support system from ERICO®. It is UL® listed and designed to meet the growing market trend of larger diameter cable sizes from the cable industry.

MAJOR FEATURES:

- **INNOVATIVE*:** Wide-base design with smooth, beveled edges provides a large bending radius for 10 Gb Systems for all J-Hook sizes. CADDY CAT LINKS meets ISO/IEC 18010, TIA-569-B and is used for large diameter cable, including Cat 6a & Cat 7.
- **VERSATILE:** Accommodates a variety of attachment methods – threaded rod, wall mount, etc. and is expandable for additional integrated pathways.
- **INTERCHANGEABLE:** All J-Hooks can be attached to other fasteners in multiple configurations.
 - J-Hook- to- J-Hook
 - J-Hook to fasteners
- **USER FRIENDLY:** Requires no screws, rivets, or special tools for installation of fastener assemblies, tree bracket assemblies or puller assemblies.
- **ENVIRONMENTALLY FRIENDLY:** The CADDY CAT LINKS is an environmentally-friendly “green” product that not only utilizes recycled raw materials in its manufacturing, but is also recyclable itself.
- **ECONOMICAL:** Less time and labor are required for the CADDY CAT LINKS system installation compared to cable tray systems, and no grounding is necessary.

CADDY® CAT LINKS: Cutting-Edge

CADDY® CAT LINKS offers the largest family of J-Hook sizes on the market. The full range provides a bending radius that meets TIA standards for Cat 6a and easily accommodates Cat 7, large-diameter optical fiber, innerduct and coax cable.

Featuring a wide base with smooth beveled edges, the CADDY CAT LINKS helps provide a secure and stable installation.

Wide base and beveled edges reduce friction and offer less vertical compaction of cables

Bendable locking tabs provide rigidity and stability for all J-Hook assemblies

Available in 1" (CAT16HP), 2" (CAT32HP), 3" (CAT48HP) and 4" (CAT64HP) sizes for a greater number of cables

Wide-base design provides the bend radius needed for large diameter cable, such as Cat 6a and Cat 7

Cable Management: Versatility & Interchangeability

The CADDY® CAT LINKS J-Hook System is quick to install and is compatible with a wide variety of CADDY fasteners.

To support a large amount of cable, J-Hook trees can be quickly and easily assembled on site in many size combinations without requiring special tools.

Tree versatility also provides an easy assembly for numerous pathway combinations. J-Hook trees can be easily configured to support the amount of cable being run per J-Hook and the types and number of cable pathways needed.

CADDY CAT LINKS is designed to accommodate high-performance cabling upgrades, which will help eliminate the need to replace your infrastructure if additional cable or pathways are added.

CADDY® CAT LINKS: User-Friendly

The CADDY® CAT LINKS is easy to install on-site without any need for special tools. It also allows other trades to add on to the bottom of the J-Hook.

TREE BRACKET INSTALLATION:

Step 1:
Firmly hold the J-Hook to prepare for assembly

Step 2:
Hook the Tree Mounting Bracket into the Locking Tabs and press-fit into position. The Tree Mounting Bracket should be mounted flush to the J-Hook

Step 3:
Hook the Locking Tabs of the second J-Hook to the other end of the Tree Mounting Bracket

ANGLE BRACKET ASSEMBLY:

Step 1:
Firmly hold the J-Hook and Angle Bracket for assembly

Step 2:
Hook the Angle Bracket assembly into the J-Hook and press-fit into position

Step 3:
Using a screwdriver, bend the Locking Tabs to firmly secure the J-Hook Assembly

CADDY® CAT LINKS: Environmentally Friendly & Economical

The CADDY® CAT LINKS is an environmentally-friendly “green” product that not only utilizes recycled raw materials in its manufacturing, but is also recyclable itself. CADDY CAT LINKS uses less material than tray systems because it is not a continuous pathway, and CADDY CAT LINKS requires less time and labor in the construction of the total installed system. And unlike basket and cable tray, grounding is not necessary.

Utilizing all metal construction, CADDY CAT LINKS meets worldwide standards and is ideal for use in multiple applications.

Versatility of multiple CADDY CAT LINKS configurations means fewer SKUs to stock and less inventory to manage.

The expanded CADDY CAT LINKS product line offers J-Hooks in a wider variety of sizes – from 1” through 4” – so contractors can select the J-Hook that is most economical for each installation. In addition, the CADDY CAT LINKS product line is completely modular – translating into inventory cost savings for both distributors and contractors. Rather than stocking J-Hook trees in a variety of configurations, simply stock the individual components and trees can be assembled as required.

ECONOMIC SNAPSHOT:

10’ of pathway constructed with 2” by 12” Wire Basket Tray uses 14 lbs of steel. The same 10’ of pathway constructed with three CAT64HP J-Hooks uses 1.6 lbs of steel. This is a weight savings of up to 88% and a labor savings of up to 75%.
