

DISPLAYPORT AND HDMI® CONNECTIVITY

DID YOU KNOW?

VGA is being replaced by DisplayPort and HDMI. In fact, DisplayPort is expected to be included on 95% of all new computers. C2G has a complete line of adapters, cables and other products to prepare you for the digital transition.

DISPLAYPORT CONNECTIVITY

DisplayPort is the new standard for accessing Audio/Video content from computer to display. A DisplayPort signal can be used to transport audio-only content, video-only content, or both simultaneously.

HDMI® CONNECTIVITY

HDMI is the most popular audio/video connection for most consumer electronics and carries digital audio and video at resolutions up to 4K at 50/60 (2160p). HDMI connectivity is most used in commercial, home theater and desktop applications.
