The New Speaker Binding Post by ICM Corp.

ICM Corp. listens to what professional installers need to ensure a quality installation each and every time. We can do that by offering great solutions for all your cable installation needs.

ICM Corp. Quality Speaker Binding Posts:

- Gold Plated, Color Coded Terminals
- Custom Sleeves Fit 12AWG, 14AWG and 16AWG
- Works With Interchangeable Wall Plate Modular Clips
- Creates A Clean Wire Connection
- In-Wall Speaker To Amplifier Connection
- Customize with ICM Corp. Speaker Connectors

The NEW Speaker Binding Post features ICM Corp.'s signature 360° compression technology for rock-solid connections each and every time. Professional installers are able to compress the speaker wire directly to the speaker binding post creating a strong, secure connection. The speaker binding post is designed to work with ICM Corp.'s Wall Plate System and corresponding modular clips to make custom installations much faster and more efficient. By creating the speaker binding post as an individual component, professional installers have fewer pieces to work with and match up, thus reducing cost and inventory. Moreover, fewer pieces also provides more space for installers to work in, and creates a clean wire connection.

The speaker binding post includes custom sleeves for 12AWG, 14AWG and 16AWG to ensure a perfect fit. Also included with the set of speaker binding posts are two screw tips (1 red/ 1 black) for identification of positive and negative connections. The speaker binding posts are designed to work with ICM Corp.'s speaker connectors. The speaker connectors can be utilized with a variety of tips that include the spade tip, banana tip and the pin tip. The speaker connectors are also available in right angle. ICM Corp.'s compression connectors, tools, and wall plate components are designed as one integrated system to complete any custom installation from start to finish.

RGSBPOST Includes:

- 2 Female Speaker Binding Posts
- 12, 14 & 16AWG Sleeves
- 1 Red Screw Tip
- 1 Black Screw Tip
