

CINEMA SERIES

Motorized Electric Projection Screen

MODEL GE

What is the Cinema Series?

The Cinema Series is a collection of versatile motorized electric projection screens. They are an ideal choice for boardrooms, classrooms and other settings where a high-performance, affordable, retractable projection screen is needed.

Experience Cinema

Cinema Series projection screens are designed for versatile applications - four control methods (manual button, IR remote, RS-232, and 12v trigger) come built-in to every screen, so you can control the screen without limitations or having to purchase additional components.

The Cinema Series is beautifully designed from its core. The custom high-powered, low-noise motor is built for reliable, long-lasting performance. The case is crafted from high-grade aluminum and powder-coated white for a light, aesthetically-pleasing appearance.

Exceptional Contrast

The Cinema Series offer several fiberglass-backed projection surfaces to meet the needs for your application. One of these options specifically engineered for ambient-lit rooms is Matte Grey. Matte Grey is designed to enhance the contrast in the projected image, reducing image washout that normally occurs in multi-use environments. Viewers will be drawn in by the clarity and sharpness of the projected image.

The Cinema Series offers white, grey, and passive 3D materials that are fiberglass-backed for improved image stability.

Features

- Stylish, white all-aluminum case.
- Multiple control methods.
- Wall or ceiling mounted.

Material Choices

All screen surfaces on the Cinema Series Model GE are fiberglass backed to reduce edge curl.

Matte White (1.0 gain): Features true color reproduction and is recommended for dark rooms.

Matte Grey (0.8 gain): Provides higher contrast for rooms with ambient lighting - perfect for classrooms and conference rooms.

SēVision 3D GX (2.2-2.4 gain): Severtson's advanced, water-based optical coating recommended for passive and active 3D projection. One of the few home theater surfaces that is RealD approved.

Who We Are

Severtson Screens is a global leader in innovative and quality projection screens for the cinema, commercial, pro AV, and home theater markets.
