D-ILA® Newly Developed D-ILA Device

The exceptional picture quality achieved by JVC projectors is a result of the precision technology behind the D-ILA device. The new 6th generation device, with a 40% narrower pixel gap, achieves a 10% improvement in light efficiency for a brighter image with higher contrast and incredibly rich detail.

a 40% narrower pixel gap from 0.5µ to 0.3µ achieves much brighter, higher contrast images

4K e-shift3 4K Precision JVC e-shift3 Technology

Optimized for the new D-ILA device, new 4K e-shift3 shifts sub-frames by 0.5 pixel both vertically and horizontally to achieve 4-times the pixel density of the original content—boosting definition to the highest level yet.

Multiple Pixel Control (Scaler/Processor for 4K e-shift3)

The newest derivation of Multiple Pixel Control is a high-performance image processor that enables precise reproduction of Full HD sources on this 4K projector. New, Auto Mode performs frame adaptive filtering and picture generation to achieve an HD image optimized for a variety of scenes thereby enabling an immersive 4K experience without complicated picture adjustments.

Notes about viewing 3D video content
 • The optional 3D Synchro Emitter and 3D glasses are required to view 3D images from the D-ILA projectors. 3D video software (3D media or output of 3D broadcasts) and a 3D-compatible video player are also required. • Perception of 3D images will vary with individual viewers. • Stop viewing 3D images immediately if any discomfort such as headaches, dizziness, eye fatigue, etc. occurs. • Viewing of 3D images by children under the age of five is not recommended. • Read the Safety Precautions in the User Manual carefully before viewing any 3D source.

120,000:1 Native Contrast Ratio

The combination of JVC's D-ILA device and the optical engine equipped with a new wire grid that improves polarization performance enables the DLA-RS57 to achieve an outstanding native contrast ratio of 120,000:1*. The newly developed Intelligent Lens Aperture optimally adjusts black levels and Clear Black boosts contrast between light and dark enabling the DLA-RS57 to achieve an amazing dynamic range of 1,200,000:1.

D-ILA 3D Projection*

There's nothing like 3D to pull you into the scene. JVC's employs an original Frame Addressing method to reproduce 3D images with vivid colors, and the optical engine featuring the new D-ILA devices achieves more brightness than ever. Furthermore, 3D image adjustment functions such as Crosstalk Canceling are featured to offer the kind of realistic and exciting 3D images that only D-ILA can provide.

*An optional 3D Synchro Emitter and 3D glasses are required to view 3D images.

Smart-phone Remote Control App

Now, JVC D-ILA projectors can be controlled from your smartphone or tablet with a free remote control app. This app features an intuitive graphical UI and exclusive controls that make operations even easier. Additionally, there are built-in help functions for smoother operation.
