

SEVERTSON SCREENS

SAT-4K

Stellar Acoustically-Transparent 4K Screen

Severtson Screens introduces the new SAT-4K: Stellar Acoustically-Transparent screen. The SAT-4K replicates the cinema experience in your home better than any screen has before. With virtually no screen size limitations, the entire sound stage can be placed directly behind the screen at the same horizontal axis, allowing the audio track to be in perfect synch with the brilliant images on display. The SAT-4K screen meets or exceeds all industry standards for optimum video and acoustic performance, with reference quality reproduction of the digital image combined with true fidelity to the soundtrack. Severtson Screens is proud to supply the home theater market with the same service and quality that has taken the cinema market by storm and cemented Severtson's position as the industry leader.

Available In:

- Impression
- Deluxe
- Deluxe Curved

2D and 3D Applications
Active 3D Compatible

Venue Versatility

A new era of venue versatility has begun. The SAT-4K material can now be used on small screens and exceptionally large screens.

The seamless acoustic weave offered by the SAT-4K is in high demand, especially for many commercial applications. The SAT-4K comes in heights ranging from 37" in an Impression Series home theater screen, to a whopping 15'10" in a Pro-Frame or cinema screen.

Frequency Response
