

SPIRIT SERIES

Motorized Electric Projection Screen

MODEL SE

What is the Spirit Series?

The Spirit Series is a collection of in-ceiling, motorized electric projection screen designed specifically for installations requiring a concealed in-ceiling projection screen on a budget. They are ideal for multi-usage environments such as hospitals, worship, conference, teaching, or training rooms where the screen needs to be hidden for aesthetic or functional reasons.

Experience Spirit

The Spirit is a series of in-ceiling electric projector screens designed for custom installation into a worship, classroom, or training room ceiling. The screen surface is fiberglass backed to greatly reduce edge curl. The perfectly flat surface is designed to last for years with minimal visual degradation.

The triangular weight bar at the bottom of the screen completely retracts into the case when it is not being used. This imitates the appearance of an expensive trap-door screen at a fraction of the price.

Smooth Operation

The Spirit can be operated in four convenient ways. A button on the case allows manual operation, the included plug-in IR receiver with remote allows semi-automatic operation, and the 5-12 volt trigger connection allows fully-automatic operation by synchronizing the screen operation with the power cycle of a compatible projector. RS-232 control also comes standard with all Spirit models.

The Spirit is equipped with a powerful motor that provides ultra-smooth, silent operation and is designed for extended durability and reliable performance.

Features

- Recessed in-ceiling installation.
- Deluxe, ultra-quiet motor.
- White, grey, or 3D materials.
- Triangular weight bar closure.
- Multiple control methods.
- Custom sizes are available.

Material Choices

All screen surfaces on the Spirit Series Model SE are fiberglass backed to reduce edge curl.

Matte White (1.0 gain): Features true color reproduction and is recommended for dark rooms.

Matte Grey (0.8 gain): Provides higher contrast for rooms with ambient lighting - perfect for classrooms and conference rooms.

SēVision 3D GX (2.2-2.4 gain): Severtson's advanced, water-based optical coating recommended for passive and active 3D projection. One of the few home theater surfaces that is RealD approved.

Who We Are

Severtson Screens is a global leader in innovative and quality projection screens for the cinema, commercial, pro AV, and home theater markets.
