

Finally. A home theater system that surrounds you with sound, not wires.

CINEHOME™ HD SERIES

THE WORLD'S FIRST TRUE 5.1 WIRE-FREE HD AUDIO SPEAKER SYSTEM FOR THE MASS MARKET.

:: PRODUCT SPECIFICATIONS

PLUG AND PLAY

WIRE-FREE HD AUDIO DEFINED - JUST UNBOX, POWER UP, AND GO.

No home Wi-Fi routers to connect to and no bridge box required. Simply place your speakers in the appropriate location, plug in the speakers' AC power adaptors into any locally available 110/220v power source, load up your Enclave Smart Center™ with sources, and Enclave Audio system is ready to deliver 24 bit uncompressed audio wirelessly - straight out of the box with no configuration necessary.

AUDIO

PURE DIGITAL. PURE SYNC.

We're audio enthusiasts too. That means one must start with ensuring the purest signal form is passed along the chain. It's here where Enclave Audio rises to the occasion. Any HDMI or SPDIF (Optical) input remains digital from the source with zero conversion to analog until it leaves the speaker enclosure's built-in amplifier to the speaker driver itself. Stunningly, the system delivers this pure digital signal wirelessly with absolutely zero noticeable lip sync issues. With Enclave Audio, degraded analog signal down long stretches of speaker wire are a thing of the past.

AMPLIFIERS

Designed to satisfy the most discriminating audio enthusiast, Enclave Audio's 6 independent Class D amplifiers are engineered to offer stunning acoustic performance in concert with Enclave's custom designed speakers. Featuring a High Performance Closed-Loop Architecture, the real story is in the powerful digital signal processing utilizing a digital crossover, an equalizer for flat frequency response, and more.

SPEAKERS

Designed and custom tuned to deliver a world class home theater surround experience, the Enclave system offers 14 distinct drivers in 6 independent speaker enclosures creating a 360 degree field of incredible sound, all done wirelessly.

5.1 HOME THEATER

At Enclave, we understand that half of the movie experience is heard and not seen. With the popularized soundbar audio solution, true surround sound is dismissed for convenience and wiring issues. The Enclave Audio 5.1 home theater system offers uncompromising true surround sound with the ability to easily place your speakers as 5.1 surround was designed and intended. Surrounding you. Whether it is movies, music, sports, or video gaming, Enclave wirelessly surrounds you with every nuance of every sound, bringing your home theater experience to life as you've never heard it before. The Enclave Smart Center™ connects to your TV with a single cable and will host HDMI and SPDIF (Optical) sources, including satellite, cable, streaming appliances, and gaming consoles.

THE WORLD'S FIRST TRUE 5.1 WIRE-FREE HD AUDIO
SPEAKER SYSTEM FOR THE MASS MARKET.

CONTROLS

OSD

On Screen Display allows for speaker gain/trim, source selection, audio format selection, system speaker test & advanced controls.

HANDHELD REMOTE

Access and control all system functions from across the room with the accompanying Enclave remote. Control volume, input, and mute or access the on screen menu at the touch of a button.

SMART CENTER™ CONTROLS

Buttons atop the Smart Center™ allow for full system control and added flexibility in using your Enclave Audio system.

NETWORKING*

WIRELESS CONNECTIVITY

Enclave Audio has designed the speakers to the Wireless Speakers and Audio (WiSA®) standard and the system will support up to 5.1 channels of uncompressed 24 bit audio to the speakers without the use of wires. It uses the 5.2-5.8GHz band, separate from Wi-Fi, to reduce interference when transmitting such dense data streams and as such is not dependent on your home wireless network to function. This proprietary network is created specifically for one purpose: The flawless delivery of crystal clear, uncompressed audio, to every speaker in the system in an incredible 5 ms. This makes the wireless audio delivery virtually unnoticeable.

BLUETOOTH CONNECTIVITY

Enclave owners can use Bluetooth technology for wireless audio streaming from almost any Bluetooth enabled device.

ENCLAVE AUDIO APP FOR IOS/ANDROID

For those using the free Enclave Audio App for iOS or Android, Enclave Audio offers mobile and tablet users locally stored music streaming via Bluetooth or Google Chromecast along with a choice of streaming music services such as TuneIn Radio, Spotify, and more.**

NETWORK STREAMING VIA APP

For Enclave app users with local or networked based music libraries, our iOS and Android apps allow users to stream music wirelessly from their shared libraries to the Enclave system via Bluetooth or Google Chromecast while connected to their local Wi-Fi network.

* Internet connection required for access to Internet radio stations, online music services and software updates (DSL, cable modem or LAN-based high-speed Internet connection required.) Internet functionality may require payment of separate fee to a service provider; local and/or long distance telephone charges may apply.

** Some music services may require subscription

Note: For the purpose of improvement, all specifications and designs are subject to change without notice.

GENERAL

POWER SUPPLY

AC-100-240V, 50-60Hz

TOP PANEL BUTTON

Power, Menu, Input, Mute

BACK PANEL
