New Part No. **65-270**
HDMI Cable Tester

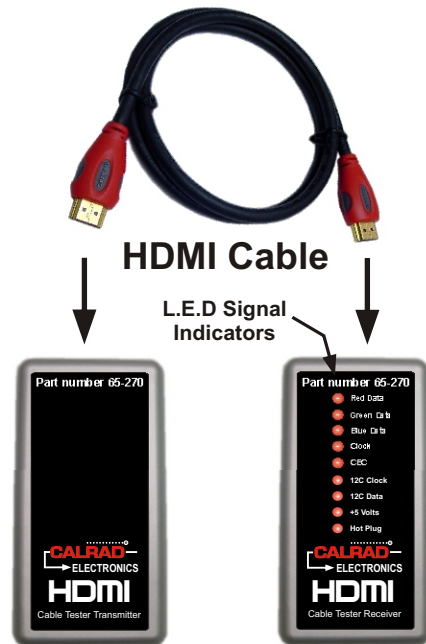

Calrads 65-270 HDMI cable tester is especially useful when cable is installed inside a wall, between two rooms. Simply connect one end of the cable to the main unit, the other end to the remote unit. The remote unit provides 9 red L.E.D indicators for each signal path. Each signal path is tested automatically. All connections are HDMI female type. Requires standard 9V battery, not included. The 65-270 may also be used to test DVI or HDMI to DVI cable assemblies. Simply use a DVI to HDMI adapter (not included) to change the DVI to HDMI use Calrad part number 35-716.

Features:

- * 8 Easy to read Red L.E.Ds
- * 9Vdc Battery powered Transmitter
- * Gold Plated HDMI Jacks for accurate long term usage
- * Test HDMI, DVI cables
- * Compatible with all HDMI and DVI cables

Perfect for system integrators and A/V installers! Pre-test and verify that all your HDMI cables work after (Pre-Wire), before the walls are closed up and your HDMI cables are permanently installed.

Optional 35-716
 HDMI Male to
 DVI Female Adapter
