

There is an Xspot™ Solution for almost any application

Xspot is a universal tool working with multiple applications across many industries both commercial and residential.

Labor is your single biggest cost, Make it Count!

How much labor does it cost to fix a sheetrocker's mistake, minutes or hours? How much time to install a 30 cent wall plate or plug?

The key to profits is getting as much done as possible at rough-in and not having to go back. Stop throwing labor at a project; use the right tool and save time and money.

Accurate to 1/4 through an inch of wood ...

Xspot technology has no moving parts or need for batteries. If one side "pulls" turn the tool over and if it "pushes" away from the wall you found the Xspot-wire attached. No more guess work, how good is your toner through 1" of wood?

Xspot™ makes every Tech, Installer or Apprentice an expert

Toners and studfinders are more art than science and requires a skilled hand and even then too many mistakes are made. Make sure you cut the hole in the right place. With today's custom finishes you can't afford a mistake.

Speakers & Keypads

Xstrap & Xspot

Mount Xstrap, loop wire into Xspot, snap onto Xstrap

Xspot™ Solution:

Keeps wires from being moved, eliminates expensive brackets, allows for change of model or location thru a 2" hole
